

# The Community Intelligence Platform

## Streamlined CHAs + CHIPs

Community Health Assessments and Community Health Improvement Plans

- Automate every step from data collection to report generation with AI-assisted workflows.
- Use built-in logic models and evidence-based program libraries to turn priorities into action.
- Track implementation, assign partners, and measure outcomes with real-time dashboards.

## Integrated Community Data + Advanced Analytics

Strategic Planning, Equity, and Local Insight

- Analyze curated federal, state, and local datasets alongside your own proprietary data.
- Identify disparities and uncover actionable insights on healthcare, housing, and more.
- Support CHAs, CHIPs, strategic plans, and equity initiatives with flexible, ready-to-use data.

## Public-Facing Data Sharing with the Health Atlas

Interactive, Accessible Community Intelligence

- Share maps, charts, and dashboards with partners, residents, and media through a branded portal.
- Showcase shared priorities, track CHIP progress, and increase data literacy in your community.
- Equip stakeholders to explore and use data independently for advocacy, alignment, and funding.
